瞬間涼感織物

Instant Cooling Fabric

以特定比例將無毒的金屬及非金屬材料，利用奈米科技分散於纖維中，提昇導熱效率，達到快速涼感效果

- 奈米技術
- 微細孔洞和微細孔道
- 吸濕速乾效果

The new Nanotechnology ensures Non-toxic metal and Non-metal materials distributed evenly in polymer and enhances the thermal conductivity for the cooling effect.

- Nano-Technology
- Micro-Pores
- Rapid Moisture Transfer
